Delta Search in Your LE Database

Using Delta Search on a Saved Property Search

In the left navigation, click the name of a saved or shared search to view a Delta Search.

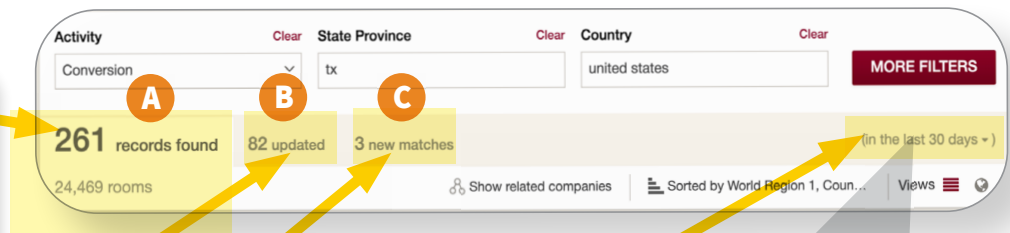

A In the search results window, you will see the total number of records found matching your search criteria.

In the search results, you now have the option to toggle between two new views:

B “X updated”— Properties with any data change in the selected time period.

C “X new matches”— Properties that were newly added to your search results during the selected time period.

You can also change your time options in the drop down menu:

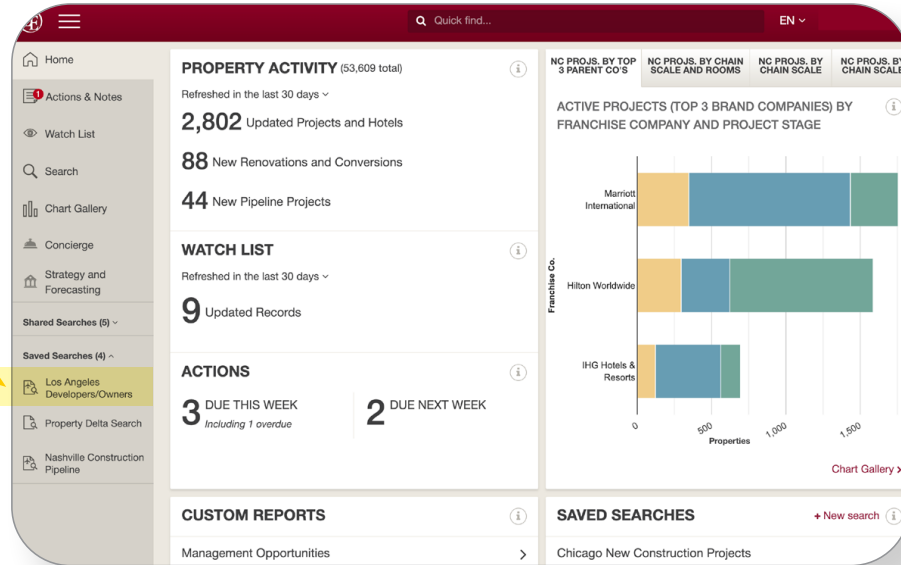

- “In the last 7 days” — shows properties that have been updated or added within the last 7 days.
- “In the last 30 days” — expands the look-back window to the past 30 days.
- “Since last login” — shows all new matches that appeared since your last login session.

Delta Search in Your LE Database

Using Delta Search on a Saved Company Search

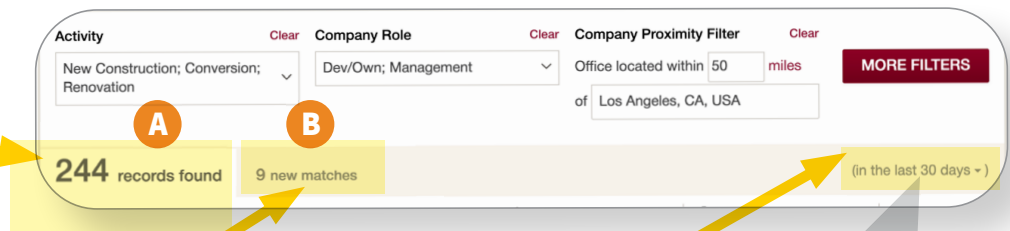

In the left navigation, click the name of a saved or shared search to view a Delta Search.

A In the search results window, you will see the total number of records found matching your search criteria.

In the company search results, you now have a second view:

B “X new matches” — Companies that were newly added to your search results during the selected time period.

You can also change your time options in the drop down menu:

- “In the last 7 days” — shows companies that have been updated or added within the last 7 days.
- “In the last 30 days” — expands the look-back window to the past 30 days.
- “Since last login” — shows all new matches that appeared since your last login session.
